For Immediate Release

Portfoliovillage.com announces Flip camera contest for members

(Massapequa Park, NY – October, 2011) Free web portfolio and website creation site, Portfoliovillage.com is announcing a new contest for students and site members. The site member with the best E-Portfolio will win a flip camera courtesy of the Portfoliovillage team.

Portfoliovillage, Inc. is a social entrepreneurship project that aims to help students and faculty create free web portfolios and websites. Developed in 2005 by St. John's Professor Dr. John DiMarco, this website provides free web portfolio server space, an online website-maker, and website addresses for students, teachers, graduates, and jobseekers at colleges, universities, k-12 schools, and libraries.

Portfoliovillage is searching for the best E-Portfolio on the site. The contest, which started September 29th, 2011 and will end December 15th, 2011, is offering the winner a flip camera. New and established members can enter the contest by visiting PortfolioVillage.com/contest. The Portfoliovillage team will determine the best E-Portfolio based on design, creativity, and original content. While Portfoliovillage can be used to create websites beyond portfolios, only portfolio sites will be considered for this contest.

The contest was created to coincide with the site launch event at St. John's University, and since has been extended to all members of the site. Through this contest, Portfoliovillage aims to encourage students and professionals to create a free E-Portfolio with the site. Portfoliovillage offers the necessary tools to develop an original, streamlined and professional E-Portfolio to showcase an array of personal work. The flip camera prize is an additional tool that will help add creativity and personality to the winner's personal E-Portfolio.

Portfoliovillage.com's state-of-the-art software offers an easy to use editing interface which allows members to create an impressive portfolio and powerful website that highlights professional skills and experience. The site provides over 1,000 website template combinations for academic, personal, professional, business or club/group websites. An extensive library of features is offered to customize websites including image tools, clipart, gradient effects, themable widgets, video widgets, and e-commerce tools.

For more information about the contest or Portfoliovillage, please visit PortfolioVillage.com.
